

 FLEXQUBE®

QUARTERLY REPORT

SECOND QUARTER 2021

SECOND QUARTER

1 April – 30 June 2021

THE QUARTER IN BRIEF

- Order intake increased by 54.4 percent to SEK 32.4 million (21.0). Adjusted for foreign exchange rate effects between the comparison periods, orders received increased by 75.1 percent.
- Net sales increased by 47.3 percent to SEK 26.5 million (18.0). Adjusted for foreign exchange rate effects between the comparison periods, net sales increased by 67.1 percent.
- Operating profit before depreciation (EBITDA) amounted to SEK -1.6 million (-1.8) and operating profit before financial items (EBIT) amounted to SEK -2.7 million (-3.0).
- Profit before tax amounted to SEK -2.8 million (-3.0).
- Earnings per share amounted to SEK -0.4 (-0.4)
- Cash flow amounted to SEK 3.1 million (-4.0), of which SEK 3.9 million (-2.7) from operating activities, SEK -0.8 million (-1.3) from investment activities and SEK 0.0 million (-0.0) from financing activities.
- Cash and cash equivalents amounted to SEK 15.4 million (13.4) at the end of the period. The group also has access to 2.3 + 10 MSEK in short term credit agreements.
- Amazon has placed an initial order of approximately SEK 6.5 million for joint development of products belonging to our robotic eQart concept.
- Lazar Material Handling Solutions, a FlexQube licensed dealer in South Africa, receives an order for over 500 carts from a prominent OEM in the automotive industry.
- During the period, the Company has issued warrants to the Board of Directors, staff and senior executives. A total of 131,000 warrants were issued, which raised SEK 438,850 to the Parent Company.
- The company has secured a guaranteed credit facility of SEK 10 million, which can be utilized if necessary.
- The company has continued to strengthen the organization with new staff in R&D, sales, supply chain and key recruitments in the form of a new COO who took office in June and a new CFO who will join the company in August. The company is expected to continue to expand the organization during the year.

54.4 %

Order intake growth

47.3 %

Revenue growth

FIRST 6 MONTHS

1 January – 30 June 2021

PERIOD 1 JANUARY – 30 JUNE

- Order intake increased by 32.8 percent to SEK 62.4 million (47.0). Adjusted for foreign exchange rate effects between the comparative periods, orders received increased by 49.5 percent.
- Net sales decreased by 5.6 percent to SEK 41.8 million (44.3). Adjusted for foreign exchange effects between the comparison periods, net sales increased by 5.3 percent.
- Operating profit before depreciation (EBITDA) amounted to SEK -6.6 million (-3.8) and operating profit before financial items (EBIT) amounted to SEK -8.9 million (-6.0).
- Profit before tax amounted to SEK -9.2 million (-6.0).
- Earnings per share amounted to SEK -1.2 (-0.8).
- Cash flow amounted to SEK 2.0 million (-4.7), of which SEK 3.3 million (-2.5) from operating activities, SEK -1.2 million (-2.1) from investment activities and SEK -0.0 million (-0.1) from financing activities.

32.8 %

Order intake growth

EVENTS AFTER THE END OF THE QUARTER

- A large electronic car maker has awarded FlexQube a project for material handling carts worth approximately SEK 10 million for the new factory in Europe.
- The company wins an order of approximately SEK 2 million for shelves and pallet carts for a larger manufacturing company in Germany.
- First order to China with order value of approximately SEK 650,000 to a company that manufactures wind turbines. The customer has for several years bought carts for factories in Europe and North America and is now taking the step with purchases to Asia.
- Order intake for the company remains strong and July, which is usually a slow month seasonally, was one of the company's best months ever with an order intake growth by 186% compared with the same month last year.

FIRST 6 MONTHS

1 January – 30 June 2021

EFFECTS OF COVID-19

- FlexQube continuously evaluates the effects of Covid-19 on the company's operations. It remains difficult to see how the company is affected in the long term by the current situation. The company has a broad diversification of markets and different customers that allows us to adapt the sales process based on the current situation and phase of the pandemic. Many of our customers have closed operations and restrictions on physical visits. This creates longer lead times and we notice that buying decisions are postponed on some deals.
- Based on our geographical distribution, the company has been most affected by closures in Mexico and England, while the situation of our American customers has gradually improved during the summer. We see that the market is starting to open up more and more to physical visits.
- The company has a well-developed model for digital meetings, such as DesignOnDemand™, and we have significantly higher inflows of digital meeting bookings. We also see greater interest from industries that have been positively affected by the epidemic. The company has not received any cancellations of current orders and we continue to see very good potential in the current sales pipeline. Our own production in Sweden or the US has not been significantly affected by the pandemic.

FlexQube's robotized eQart® is based on the same modular concept as the mechanical carts. Standardized building blocks that enable customer-unique and completely flexible robotized carts to be created.

CEO LETTER

SALES AND ORDER INTAKE RECORDS, WITH BREAKTHROUGH ORDERS FROM CUSTOMERS INCLUDING AMAZON

Order intake for the second quarter reached SEK 32.4 million, which is the first time we have reached over SEK 30 million in a single quarter, and it is our strongest order intake ever. It's also 54% higher than the second quarter of 2020. In addition, we reach SEK 26.5 million in sales, which is also a record for a single quarter and 47% higher than the second quarter of 2020.

During the quarter we have two outstanding highlights. The first is, of course, attributed to the deal with Amazon regarding products and joint development for our robotic eQart concept. The initial order value amounts to approximately SEK 6.5 million and this first project is expected to be completed by the end of 2021. This partnership with Amazon is by far our most important and biggest milestone in the company's history and our team has done a fantastic job of running this project. Amazon is the company that is absolutely at the forefront when it comes to logistics robots and that FlexQube was able to win the tender around the robot concept is a fantastic evidence of FlexQube's logistics cart system, where digital and mechanical building blocks are combined.

"The deal with Amazon marks the definitive tipping point for our transformation from purely mechanical cart company to becoming a robotics tech company for internal logistics."

The deal with Amazon marks the definitive tipping point for our transformation from purely mechanical cart company to becoming a robotics tech company for internal logistics.

The second big highlight is our largest single deal to date of approximately SEK 10 million with a large electronic car maker that was communicated in July. We have been awarded a cart contract for the new factory being built in Europe, a factory that will be the most advanced built to date and the largest factory to produce electric vehicles in the world with a capacity of 500,000 cars per year.

Our unique modular concept creates insurance for our customers to be able to take advantage if they need to rebuild or adapt the carts over time. This was a crucial factor for this project. When a new factory is being built, things will always have to be modified and adapted for changing requirements. With our concept, we ensure that the customer gets robust, safe and ergonomic carts that are also flexible to be able to handle this. With the project of a large electronic car maker, we believe our brand will strengthen significantly in the German market but also globally. If we look at how volumes have developed with other customers after initial deals, the opportunities are good for continued increased order intake from the customer in the future, both in Germany but also at their other factories.

FlexQube's concept can also come in handy when our customers are ready to automate more processes, as the modular nature of the building blocks makes it possible to upgrade mechanical carts to autonomous eQarts. This is something we are completely alone in offering.

SALES & PROFIT

We are again seeing strong growth for both sales and order intake in Europe, where order intake is growing by almost 350% compared to the second quarter of 2020. It is also 44% higher than our best quarter ever to date in Europe and the rest of the world (excluding North America). This is driven by the higher order intake in the DACH region as well as South Africa through our distributor Lazar Intralogistic.

“ We are again seeing strong growth for both sales and order intake in Europe, where order intake is growing by almost 350% compared to the second quarter of 2020. It is also 44% higher than our best quarter ever”

The order book has surpassed SEK 30 million at the end of the quarter for the first time and it's a substantial increase compared to the SEK 10 million we had at the end of 2020.

We also see a good development of our cash flow, which lands at approximately SEK 3.1 million. We have implemented several measures to ensure that despite continued investments in the business, we can still be on a cash flow level to grow our business in a satisfactory way. Measures include working with suppliers, customers as well as inventory levels to reduce tied-up capital. There is still a lot to be done on this side, which we see will continue to have a positive impact during the year.

EBITDA also improved in the quarter, landing at SEK -1.6 million compared to SEK -5.0 million in the first quarter of this year and SEK -1.8 million in the second quarter of 2020.

During the beginning of 2021, the prices of raw materials, primarily steel, have affected us and our suppliers. It is not only large price increases, but also difficult to get hold of materials. Although this affects us, we have relatively short lead times between quotation and order and can compensate customers with increased prices. Furthermore, customers are understanding in cases where we have communicated delays as they experience the same from many different suppliers.

On the electronics side, there are longer lead times on many components, which can affect the ramp-up of sales in the eQart segment. However, we work closely with our main suppliers to secure access to components to handle larger volume increases. There is also continued high activity on the quotation side and in the second quarter our total quotation value was three times higher than in the second quarter of 2020 and 65% higher than in the first quarter of this year. The same high rate continued at the beginning of the third quarter.

FLEXQUBE'S ROBOTIZED EQART®

In mid-April, we won an order with four robotized eQarts to Apotea, a well know ecommerce company in Sweden. It is a very interesting order that gives us confidence to go into more ecommerce applications with our robotic eQart concept. Easy implementation and an extremely flexible concept like the eQart, makes us believe we have a winning concept for all different type of businesses going forward. The eQarts will be used to transport inbound material throughout the warehouse. This increases efficiency and has a payoff period for the investment on under a year. We've also made a similar deal with Siemens Mobility in Georgia USA where the easy implementation has been crucial.

"As for our AMR concept, eQart Free, which Amazon has ordered, we are currently setting up the business plan for a major launch later in the year."

June was our best delivery month to date for our robotic eQart concept with sales of SEK 1.7 million and we continue to see increased interest in our widely launched product line, the eQart Line. We expect order intake to grow sequentially in the third quarter again. As for our AMR concept, eQart Free, which Amazon has ordered, we are currently setting up the business plan for a major launch later in the year.

Most competitors work with similar navigation technology and the robots are very standardized regardless of the supplier. At FlexQube, we are instead driving the development with a focus on the application to move materials and present them to the operators in the warehouses and factories in an efficient and customized way for the business. This is possible through our modular building block concept where we combine cart and robot in one unit and can be customized indefinitely. The fact that we closed a deal with Amazon in June is proof that we have a unique concept that is timely and can quickly adapt to the needs customers have or will receive in their internal logistics.

DEVELOPMENT

We have seen a sharp increase in activity for corporate transactions in internal logistics recently. In early July, Fetch Robotics (sales of approximately SEK 85 million in 2020) was acquired by Zebra Technologies for approximately SEK 2.6 billion. In mid-July, ABB acquired the Spanish company ASTI, where ABB has stated that logistics robots are the future, and they estimate that the market will exceed SEK 120 billion in 2025. It is clear that more and more companies want to position themselves in the internal logistics market, which is expected to grow strongly over the next decade.

When we look at the market, we are surprised that not more companies focus on the knowledge of internal logistics and being able to create unique and optimal applications for the customer's exact needs. We have a big head start with over 800 customers and more than 5000 unique customer applications for carts, both mechanical and robotic. We already have the corresponding technology used for both Fetch Robotics and ASTI's robots but in addition a modular concept for both the digital and mechanical building blocks.

Our competitors usually specialize in designing and manufacturing material carts or on offering robots to move these carts, where we are alone in offering both in one unit. At FlexQube, we combine these two into one concept within the framework of the eQart. Looking ahead, we believe that navigation technology and robotics will become more and more generic and that the value lies rather in offering a whole with a focus on the application itself for the user. Our modular concept for designing the cart application - to both transport and present materials in an efficient, ergonomic, and safe way - is key in this whole mindset.

“In early July, Fetch Robotics (sales of approximately SEK 85 million in 2020) was acquired by Zebra Technologies for approximately SEK 2.6 billion.”

So far, we are in the start-up phase of our dealer relationships (at the time of writing we have 16 active retailers) and it is primarily Lazar in South Africa that contributes to our sales volume. An important deal for our distributor in South Africa was to get an order for over 500 carts to a major international car manufacturer. We intend to continue to expand our dealer network to create greater leverage in our sales work.

Finally, I note that the second quarter was a breakthrough quarter for the company where we were recognized as a robot manufacturer with unique attributes through the order to Amazon. Through the deal to a large electronic car maker, I believe that we are establishing ourselves as the world's leading supplier of material handling cars as The customer may be considered a flagship customer many other companies look up to. I have pointed this out before, but we are only at the beginning of our journey, where every day we receive strengthening evidence that our unique offer and solution is very good, and in a market that will develop extremely aggressively over the next decade.

Anders Fogelberg
CEO for FlexQube AB (publ)

FINANCIAL SUMMARY

1 April - 30 June 2021

Numerical data given in brackets in this interim report refer to comparison with the interim period April - June 2020 or the balance sheet date 2020-06-30. FlexQube's accounting currency is in Swedish kronor (SEK). When converting foreign subsidiaries' income statement, the Group applies an average price for the year, for the comparison period 2020, an average price based on the current quarter's three months is applied.

ORDER INTAKE

The Group's order intake during the current quarter amounted to SEK 32.4 million (21.0), an increase of 54.4 percent compared to the same quarter last year. This is a new record level for the Group during the quarter.

REVENUE

Net sales for the quarter amounted to SEK 26.5 million (18.0), an increase of 47.3 percent compared to the same period last year. Total revenue increased by 51.3 percent and thus amounted to SEK 27.1 million (17.9) at the end of the period. This represents a new record level for the Group during the quarter.

FINANCIAL SUMMARY

1 April – 30 June 2021

OPERATING INCOME

Operating profit before depreciation (EBITDA) amounted to SEK -1.6 million (-1.8). The improvement in earnings is mainly attributable to increased sales.

Personnel costs have increased by 82.2 percent and are mainly due to the fact that distribution and assembly have been insourced in North America. Other external costs have increased by 11.5 percent and are primarily due to increased freight costs with the higher volume.

Operating profit before financial items (EBIT) amounted to SEK -2.7 million (-3.0), with depreciations amounted to SEK 1.2 million (1.1).

Profit before tax amounted to SEK -2.8 million (-3.0) and profit after tax amounted to SEK -2.8 million (-3.0).

Deferred tax claims on loss carryforwards has not been taken into account.

CASH FLOW

Cash flow for the period amounted to SEK 3.1 million (-4.0), of which:

Cash flow from operating activities amounted to SEK 3.8 million (-2.7) and is mainly due to the change in working capital and the use of selling customer invoices.

Cash flow from investment activities amounted to SEK -0.8 million (-1.3). The change between the comparison periods is due to reduced investments in intangible fixed assets linked to development programs to complement FlexQube's mechanical building blocks with mechatronic building parts ("FlexQube 4.0").

Cash flow from financing activities amounted to SEK 0.0 million (-0.0).

FINANCIAL SUMMARY

1 January – 30 June 2021

Numerical data given in brackets in this interim report refer to comparison with the interim period April - June 2020 or the balance sheet date 2020-06-30. FlexQube's accounting currency is in Swedish kronor (SEK). When converting foreign subsidiaries' income statement, the Group applies an average price for the year, for the comparison period 2020, an average price based on each quarter is applied.

ORDER INTAKE

The Group's order intake during the current period amounted to SEK 62.4 million (47.0), an increase of 32.8 percent compared to the same period last year.

REVENUE

Net sales for the period amounted to SEK 41.8 million (44.3), a decrease of 5.6 percent compared to the same period last year. Total revenue decreased by 6.8 percent to SEK 42.4 million (45.5) at the end of the period.

OPERATING INCOME

Operating profit before depreciation (EBITDA) amounted to SEK -6.6 million (-3.8). The improvement in earnings is mainly attributable to decreased sales during the first quarter.

Personnel costs have increased by 46.9 percent and are in line with increased organization and insourced distribution and assembly in North America. Other external costs have decreased by 18.7 percent and relate primarily to reduced marketing costs and generally reduced operating costs such as travel due to certain restrictions linked to Covid-19 in our markets.

Operating profit before financial items (EBIT) amounted to SEK -8.9 million (-6.0), with depreciation amounted to SEK 2.4 million (2.3).

Profit before tax amounted to SEK -9.2 million (-6.0) and profit after tax amounted to SEK -9.2 million (-6.0).

Deferred tax claims on loss carry-forwards has not been taken into account.

CASH FLOW

Cash flow for the period amounted to SEK 2.0 million (-4.6), of which Cash flow from operating activities amounted to SEK -3.3 million (-2.3) and is mainly due to the change in working capital and the use of selling customer invoices. Cash flow from investment activities amounted to SEK -1.2 million (-2.1). The change between the comparison periods is due to reduced investments in intangible fixed assets linked to development programmes to complement FlexQube's mechanical building blocks with mechatronic building parts ("FlexQube 4.0"). Cash flow from financing activities amounted to SEK 0.0 million (-0.1).

FINANCIAL POSITION

30 June 2021

Numerical data given in parentheses in this interim report refer to comparison with the balance sheet date 2020-06-30. FlexQube's accounting currency is in Swedish kronor (SEK). When converting foreign subsidiaries' balance sheet items, the Group applies the current exchange rate as of 2020-12-30 and 2021-06-30 respectively.

CONSOLIDATED BALANCE SHEET

The company's total assets as of June 30, 2021 amounted to SEK 81.3 million (78.8).

Intangible fixed assets amounted to SEK 15.4 million (17.5). This item consists mainly of expenditure related to development costs for development programs that will complement FlexQube's mechanical building blocks with mechatronic building parts ("FlexQube 4.0"). Other items included in intangible fixed assets are expenditure on development work regarding IT and software solutions towards customers, patents and trademarks, as well as conceptual development of FlexQube's mechanical building blocks.

Current assets amounted to SEK 63.2 million (58.4) at the balance sheet date, of which inventories amounted to SEK 25.2 million (22.3), trade receivables amounted to SEK 17.5 million (17.6) and cash and cash equivalents amounted to SEK 15.4 million (13.4).

At the end of the period, equity amounted to SEK 34.6 million (59.6).

Short-term liabilities amounted to SEK 37.3 million (18.9) and consist mainly of accounts payable in combination with accrued expenses and prepaid income.

THE FLEXQUBE SHARE

FlexQube's share capital on June 30, 2021 amounted to SEK 0.7 million. The number of shares amounted to 7,433,333 with equal rights, corresponding to a quota value of SEK 0.1.

The company's share is listed on Nasdaq

Stockholm First North under the symbol FLEXQ since December 14, 2017. FlexQube had a turnover during the period 1 January to 30 June 2021 of 0.5 million shares. This resulted in an average turnover of approximately 4 105 shares per trading day with a value of SEK 133 269. The average price for the share during the period was approximately SEK 30.9.

The last close at the end of the period was SEK 43.5, an increase of approximately 45 percent from the IPO price at the close on December 14, 2017, or an increase of approximately 45 percent from the closing price on December 31, 2020.

PERSONNEL

The number of employees at FlexQube reflects the scalable operating model that the Group is actively working on, partly to be able to use economies of scale in the longer term and partly because of a somewhat limited cost suit in the short term.

The number of employees on 30 June 2021 was 37 (26.5), of which 6 were women (5). The average number of employees in the period January to June 2021 was 35 persons (26.9), of whom 7 were women (6). It can also be noted that with the company's organizational structure, the company has about 20-30 additional people at the disposal of suppliers and external consultants.

RISKS AND UNCERTAINTIES

FlexQube is an internationally active company that is exposed to a number of market and financial risks. Identified risks are continuously accompanied, where measures to reduce the risks and their effects are taken where necessary.

FINANCIAL POSITION

30 June 2021

Examples of financial risks are market, liquidity and credit risks. Market risks consist mainly of currency risk. FlexQube's Board of Directors is ultimately responsible for managing and monitoring the Group's financial risks. Currency and liquidity risks represent the most significant financial risks, while interest rate, financing and credit risk can be attributed to lower risk.

The currency risk is due to the fact that part of the Group's revenues are in EUR for the European market, while operating expenses are mainly in SEK. The U.S. unit has local manufacturing and supply chain in the United States and only limited purchases are made in a currency other than USD. Thus, the currency risk is limited for the US entity, except for any intra-group transactions.

The liquidity risk is mainly due to the fact that the Group's larger customers require long payment periods and that the Group is in an expansive phase.

The Group is actively working to reduce these, where existing global financing agreements ensure a satisfactory cash flow. Liquidity risk is managed continuously in cooperation with the Group's lenders and other financial partners.

A new risk for the company from 2020 is the spread of the corona virus. It is very difficult to overlook the potential consequences of the current epidemic. However, the epidemic can have both direct and indirect effects on the company's operations in the form of, for example, production difficulties due to sick leave, problems with component deliveries from external suppliers, reduced demand for the Group's products in the event of a downturn or closed operations with customers, difficulties in leading the company if senior executives or other key employees have longer sick leave, credit losses on accounts receivable and the like. For a more detailed review of business risks and impacts so far, please refer to page 4 of this report.

ABOUT THE PARENT COMPANY

FlexQube AB (publ) in Gothenburg with org.nr. 556905-3944 is the group's parent company. In connection with the company's IPO, the Parent Company has established a management function for the Group, within the framework of management and governance. All other business-related transactions that do not involve group management, with external and/or intra-group parties, are primarily traded by the subsidiaries.

PARENT COMPANY'S FINANCIAL SUMMARY OF THE SECOND QUARTER OF 2021

Numerical data given in brackets refer to comparison with the interim period 1 April to 30 June 2020 or the balance sheet date 2020-06-30. The parent company's accounting currency is in Swedish kronor (SEK).

SALES AND OPERATING PROFIT

The parent company's net sales amounted to SEK 0.0 million (0.0). Other operating income refers to a decrease in accrued currency gains on loans to subsidiaries in foreign currencies amounting to SEK -0.6 million (-1.6).

Operating profit before financial items (EBIT) amounted to SEK -1.0 million (-2.2). It can be noted that board fees have been reclassified from external other services to personnel costs and may cause some disruption in the comparability of periods.

Profit before tax amounted to SEK -0.7 million (-1.8) and profit after tax amounted to SEK -0.7 million (-1.8).

PARENT COMPANY'S FINANCIAL SUMMARY OF THE ACCUMULATED PERIOD 2021

Numerical data given in brackets refer to comparison with the interim period 1 January to 30 June 2020 or the balance sheet date 2020-06-30. The parent company's accounting currency is in Swedish kronor (SEK).

SALES AND OPERATING PROFIT

The parent company's net sales amounted to SEK 0.0 million (0.0) for the current period. Other operating income refers to changes in currency on loans to subsidiaries in foreign currencies amounting to SEK 0.8 million (0.0).

Operating profit before financial items (EBIT) amounted to SEK 0.1 million (-0.9).

Profit before tax amounted to SEK 0.7 million (-0.1) and profit after tax amounted to SEK -0.7 million (-0.1).

THE PARENT COMPANY'S FINANCIAL POSITION

The parent company's total assets amounted to SEK 97.9 million (97.7) as of June 30, 2021.

Fixed assets amounted to SEK 95.9 million (90.9) and consist of shares in and loans to subsidiaries. The difference between the comparison periods is attributable to increased capital injections into subsidiaries. Current assets amounted to SEK 2.0 million (6.9) and consist mainly of cash and cash equivalents. The change in cash and cash equivalents is attributable to capital injections into the subsidiaries. The parent company's equity amounted to SEK 97.2 million (97.5). Short-term liabilities amounted to SEK 0.7 million (0.2) and consist mainly of fees to the Board of Directors.

ACCOUNTING PRINCIPLES

The current interim report has been established in accordance with ÅRL and the General Council of the Swedish Accounting Board BFNAR 2012:1 Annual Report and Consolidated Accounts (K3). The accounting principles are unchanged compared to the previous year. For definitions, see the annual and consolidated financial statements for 2020.

This is a translation of the official Swedish quarterly report. In case of any deviations between the Swedish and English report the Swedish report always prevail.

DEFINITIONS OF KEY RATIOS

Equity per share: Equity at the end of the period divided by adjusted number of shares at the end of the financial year.

Order intake: Value of orders received during the specified period.

Cash flow for the period: Total cash flow from operations at the end of the period.

Earnings per share: Profit for the period in relation to adjusted average number of shares during the financial year.

Working capital: Inventories and trade receivables minus trade payables.

Operating margin (EBIT%): Operating profit after depreciation as a percentage of net sales.

Operating profit before depreciation (EBITDA): Operating profit before depreciation, interest and tax.

Operating profit (EBIT): Operating profit before interest and tax.

Equity ratio: Relationship between the company's equity and the total assets in the company's balance sheet.

The Board of Directors and the CEO certify that the interim report provides a true and fair view of the parent company's and the Group's operations, position and results and describes significant risks and uncertainties faced by the parent company and the companies that are part of the Group.
